EDUCATION

Concordia University

Bachelor of Engineering Software Engineering

Montreal QC
Sep 2015 - April 2019

EMPLOYMENT

John Hancock

Full Stack Software Engineer

Boston
2023-03 - Present

- Implemented MFA migration away from email across several applications using React and NodeJs, improving and enhancing security standards.
- Designed and built new registration and validation workflows with React, NodeJS, .NET, and Spring.
- Improved the performance of several utility APIs by up to 20% using NodeJS and .Net.
- Introduced feature flags across all internal applications, enabling A/B testing and lowering time to production by 10%.
- Engineered a new API middleware to facilitate the integration between LDAP and various in-house applications, bolstering data accessibility and interconnectivity.
- Mentored junior engineers, guiding them in solving problems efficiently using best practices.

Microsoft

Software Engineer

Vancouver
2022-03 - 2023-02

- Implemented a follow-topic system increasing user engagement for selected topics by up to 27% using React and .NET.
- Created a 'Topics for You' page, displaying a custom feed based on user preferences, increasing ad revenue for topics pages by 2.4%.
- Member of the Livesite Excellence Crew, which provided training, troubleshooting guides, and investigative queries, improving time to resolution of live sites by 60%.
- Modified and built API responses to support new features in MSN with .NET.
- Created news carousels for relevant categories on MSN news using React and .NET.

Canadian Broadcasting Corporation

Software Engineer

Montreal
2019-04 - 2022-03

- Implemented microservices to process thousands of media files per day using Python, RabbitMQ, and Celery.
- Built and maintained an internal monitoring tool for media pipelines using Flask, Angular, and MongoDB.
- Integrated a continuous deployment system for the audio and video broadcasting devices using Ansible, Python, and Jenkins.
- Created workflows that modify and distribute thousands of media files per day to various internal applications using Python.

SKILLS

Programming Languages:	Python, .NET, React, Angular, Node, Java, Golang, HTML, CSS
Technologies:	Ansible, Jenkins, MongoDB, SQL, Rabbit MQ, Celery, AWS, Kusto
Languages:	English (Mother Tongue), French (Fluent)

TECHNICAL EXPERIENCE

Quality Doc *.Net, Angular, SQL*

Built a real-time web application for PDF review, management, version control, and statistical analysis for documents within a project or a team.

Wheel Snipe Celly *Hugo, HTML, JavaScript, Scss*

wheelsnipecelly.info

Designed and developed a hockey-related blog, including Google Analytics to track impressions made on the page.

Workout *React, Firebase*

<https://mateuse.github.io/workout/>

Created a workout app that allows users to track and modify their workouts by adding exercises, organizing workout days, and managing complete workout routines.
